

Robert S. Foltan, P.E. serves as Chief Engineer where he is responsible for reservoir operation and dam safety. He began his service with the Regulating District as the Operations Engineer effective May 1999, and was named Acting Chief Engineer in December of 2000. Prior to joining the Regulating District, Mr. Foltan was a Project Engineer with O'Brien & Gere Engineers, Inc. Mr. Foltan's professional experience includes hydroelectric, dam, and water resource engineering with consultants and private developers in Maine and New York. Mr. Foltan received his Bachelor of Science/Technology in Civil Engineering from the Rochester Institute of Technology, Rochester, NY, in 1988. He has been licensed as a professional engineer in New York State since 1995.
